

For Food & Beverage

Modissoft™

Revolutionizing Businesses.

Every **process** for every **business.**

Modisoft's highest **priority** is to help
independent **businesses** flourish.

Sohail Modi, the founder of Modisoft, understands the position of independent businesses; he owns a convenience store himself. For his own business and others', he decided to create a comprehensive system to serve all of their back office software needs. He shared it with his community as the initial developer, salesperson and support for the system.

Modisoft began as a free desktop program that business owners could download. As Modisoft grew and moved onto a server, clients were only charged the cost of the server to keep it running. Now, Modisoft is the most effective, complete and economically friendly software for businesses of all kinds and sizes.

Modisoft operates by a philosophy of nurturing businesses and their sense of community. Even as they grow and branch out into diverse industries, the camaraderie and mutual support remain;

Modisoft stays in touch with its clients, actively listens to feedback and applies solutions to continue perfecting the software for everyone. It was built with all the necessary insights to deliver the exact tools its clients need, and it is always evolving with the market to keep them competitive.

We have the tools you need to run a successful business, grow and expand to multiple locations and enjoy smooth logistical operations.

Modisoft's system is flexible enough to accommodate a wide variety of business types including retail, cafes and restaurants, convenience stores, grocery stores, liquor shops and tobacco shops.

The software has features that simplify processes in tracking inventory, employee hours, payment processing and many other facets of running a business that other point of sale and back office systems do not offer in one affordable package. This flexibility also allows business owners to manage multiple stores as they open new locations. This means that Modisoft grows as you do!

You are the reason we do this. We believe in the mission of small businesses because we came from one. Join Modisoft's community to run your business smoothly — **we've got your back.**

At Modisoft, we strive to create the technology you can count on, no matter your background. By keeping things Simple, our designs are streamlined and easy to use.

With our Reliable technology, you can be sure it always works in the exact way you need, every time. Designed for Efficiency, we aim to minimize any excess steps or barriers that other PoS services may have – ensuring all experiences for all users are as seamless as possible.

Together, these three values define everything we do. We never forgot our foundations as a small store owner, in need of effective, all-in-one software to handle back office needs. And as such, we feel the same pressures as many small businesses, looking to compete with larger stores around them. Now, we make that relief accessible to businesses of all sorts: our simple, reliable efficiency letting owners focus on growing their passions as effectively as possible.

Insights

Modisoft is a complete solution that efficiently organizes everything from payroll to pricing, inventory management to loyalty programs, and automated reports with insights. Our intuitive POS system is designed to boost your business's performance and provide efficiency across multiple locations, even from the convenience of your phone.

Every Business: Fits Your Niche and Scope

Modisoft adapts to your needs with intuitive technology that is designed for Full Service, Fast Casual, Fast Food, Bars, Restaurants, and more. Made to improve your business, our POS system is able to manage orders, customize customer experience, and boost team efficiency for management made simple.

Every Store: Multi-store Expertise

Our advanced software and hardware are designed with flexibility to adapt to your niche and growing business. Whether you own one location or multiple in the food and beverage industry, our technology adapts with customizable tools to meet your business objectives. Whatever your admin process demands, our services provide a comprehensive solution to connect across multiple channels.

Every Function: A Comprehensive Admin System

With an all-encompassing design, our tools are able to efficiently manage orders in front and back of house on multiple devices that sync in real time. With improvement to POS operations, you will be able to process payments faster, track inventory, and manage payroll with updated insights to improve operations.

Inventory

Efficiently manage your inventory with accurate and up-to-date pricing

- ✔ Simplify managing your price book
- ✔ Optimize profit margins and stay competitive in a growing market
- ✔ Give customers fair and consistent pricing

Payroll and Banking

Streamline expense management with seamless integration

- ✔ Connect directly to your bank for faster payments
- ✔ Generate printed checks with our printing solution
- ✔ Manage payroll and stay compliant with local labor laws and regulations
- ✔ Track credit payments with assurance

Point of Sale

Treat your customers, employees and yourself well with reliable and flexible point of sale. Modisoft's system functions both on the Cloud and offline, ensuring that it operates smoothly for you at all times, no matter how busy your cafe, restaurant, or bar gets during the day.

Adaptable Interface

Our Point of Sale tools are adaptable to any full service restaurant, fast casual dining, fast food location, bar, or cafe. With our technology you can manage payments, customize menus and tipping, keep track of discounts, and organize kitchen workflow on a phone, tablet, or standalone POS system.

Menu Customization

Our technology automatically generates customer profiles with every transaction. With this valuable data, you can easily track their order history and menu preferences. Our enhanced level of menu customization increases customer satisfaction and streamlines kitchen operations with easy fulfillment.

Multi-store Single Access

Manage all your stores through our Single Access system, easily track and transfer inventory between locations and print labels, no matter the number of restaurants you have.

Point of Sale Hardware

Our hardware is reliable, modern, and durable to handle even the busiest of kitchen environments. All hardware and accessories are easily integrated to fit your needs for maximum efficiency.

Payment

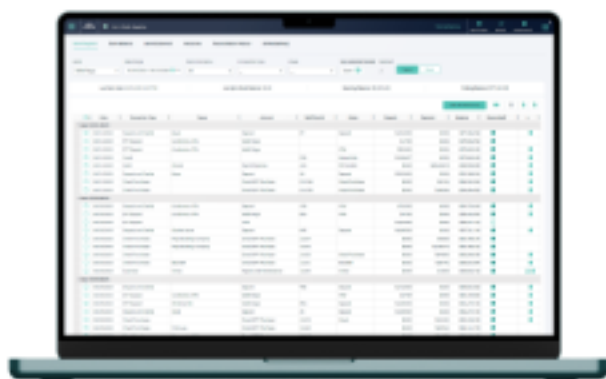

Experience secure transactions with minimal transaction fees for all locations with mobile point of sale, online orders, and in-person payments. With seamless banking and updated industry pricing through insights, you can stay competitive in your market.

Seamless Switch

New merchant accounts are activated and fully operational within 24 to 48 hours, allowing you to accept credit card payments without interruption. Additionally, we will subsidize any fees associated with terminating your old account. Easily switch your product catalog and ensure your business remains competitive with updated pricing and optimized profit margins.

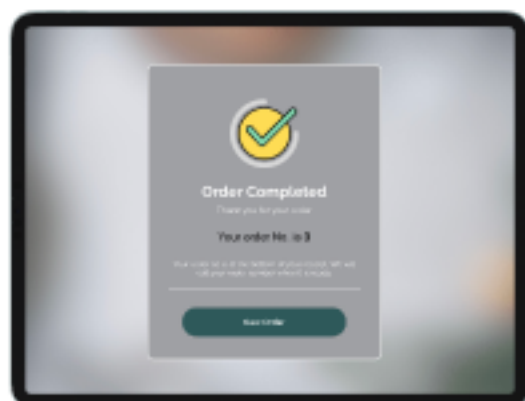

Smooth and Secure

We take significant measures to offer secure payment processing solutions that adhere to PCI standards and safeguard your business, enabling you to accept credit cards and facilitate customer payments through mobile point of sale and online orders.

Fast Funds Access

You can easily access your funds through our complete solution, with fast and effortless payment processing. Seamless integration with your bank allows payments to be directly deposited in 1 to 2 business days. Generate printed checks and monitor credit payments, all with assurance of accurate reporting.

No Catch

We are dedicated to empowering you with our payment processing solution. We never charge monthly fees, require long-term commitments, or spring any surprise costs on our clients. Our pricing model is straightforward and affordable, starting at a flat rate per swipe.

Cartzie

Simplify curbside pick-up, delivery orders and drive-thru for your locations with the easy-to-use Cartzie app! To make your products and services more accessible and promote visibility in your area, give your business the Cartzie advantage.

Online Orders

The Cartzie app simplifies online deliveries for your customers and employees. Grow and expand your business through online payments with smooth logistical operations for curbside pick-up and delivery orders.

Customer Loyalty

Build consumer confidence and simplify promotion events by automatically notifying your regulars about special deals. Frequent customers will appreciate your commitment to giving them the best offers and customized combos.

Rewards Program

Improve the experience for customers and employees with a simple and straightforward Rewards Program that is accessible with a single scan. Have an edge over your competitors through increased customer loyalty and the data collected on their menu preferences and more.

Customer Engagement

The software features a Promotions tool perfect for improving online orders and foot traffic via special offers or events. From holidays to your restaurant's anniversary, you can build connection through automated features.

Customer Profiles

Effortlessly manage and track customer profiles from transactions

- ✔ Promote your unique menu by offering discounts
- ✔ Track activity and build customer profiles to inform your sales and discount strategy
- ✔ Track and store your data in our top-notch systems

Digital Menu

The cutting-edge designs of Modissoft's digital menu boards can enhance your service and provide a modern touch that sets your establishment apart from the competition.

Save on Signage

Eliminate expenses related to pricey hardware or expensive custom static menu boards. Modissoft Digital Menu technology enables menu customization in real-time and adaptability to customer preferences and seasonal specials.

Establish Your Brand

Our Digital Menu board embraces the opportunity to make a positive impression with your brand's voice at the center. Utilize one of our numerous templates to create your own unique design that helps drive sales and engage customers.

Access from Anywhere

Access your Digital Menu settings from any location and device to make screen modifications instantly or update the menu without having to be on-site.

Sales and Specials

Create promotions and combos with our intuitive tools that are able to manage bundled deals and percentage-based discounts that your customers will enjoy. Display your own unique specials to grow your customer base further!

Hardware

No hidden fees for necessary equipment, we have everything you need. Modisoft's point of sale terminals are easy to install, and the Modisoft TV will fit seamlessly in your store with the latest stylish design and advanced technology.

POS Computer

Featuring a stylish design and cutting-edge technology, our intuitive touchscreen display supports inventory management, sales analytics, and works with kitchen display systems, order and tab management, and user-friendly order pages.

Scanner & Scales

Integrate our scanner and scales with our software to get the most comprehensive inventory management solution. The features include wireless connectivity to adapt to your space, barcode scanning for easy bar or restaurant transactions, and weight measurement.

Payment Terminals

Keep it simple with a secure payment process that features the latest technology and color touchscreen display. Our built-in security measures like point-to-point encryption and tokenization paired with a centralized dashboard reduce bottleneck issues and optimizes daily operations.

Accessories

Our array of accessories are designed to complement our software and hardware products. Enhance customer experience with accelerated systems that keep up with the latest trends and unique service needs to streamline operations. Built with high-quality materials and advanced technology, your business will be able to keep up with peak bar, restaurant, or cafe hours.

Printers

Our printers are built with durable materials designed to last. Each one comes with wireless connectivity to any connected device and includes fast printing speeds to keep up with peak hours or busy seasons.

Cash Drawer

Create stronger security at all your locations with a Cash Drawer. We offer secure storage made from durable materials for cash and important documents for long-lasting use in a business environment. Our drawers work seamlessly with our POS systems and come with advanced security features to prevent unauthorized access and ensure safety.

The background is a solid teal color. It features several 3D geometric shapes, including a large, light-teal rectangular block with rounded corners in the upper right and a smaller, darker-teal rectangular block with rounded corners in the lower right. Thin white lines are scattered across the background: a horizontal line near the top left, a vertical line near the top right, and a horizontal line near the bottom left.

**Simple,
Reliable,
Efficient.**
